Group Work Evaluation

Both students in a group must submit this form for each group assignment. Fill out the form, export it to a pdf, and submit it on eClass.

Evaluate your group.

1) Using a total of 100%, distribute this among your group members to indicate how much work & effort you think each person has put into the assignment. Remember to consider tangible results, code ideas, contributions to the discussions, and leadership. If you both worked equally, write 50% for each person.

Group Member (include yourself)	% Contribution
Total:	100%

2) State, and briefly explain, the single most important contribution that each member of your group has made (including yourself) to this assignment.

3) Optional – add any additional information of which we should be aware.
